THE ANNALS
of
STATISTICS

An Official Journal of the
Institute of Mathematical Statistics

Articles appearing in *The Annals of Statistics* (volumes 1–17) are indexed in the *Cumulative Index to IMS Scientific Journals*, available from the Institute of Mathematical Statistics.

VOLUME 19

1991

CONTENTS OF VOLUME 19

Wald Lectures, Invited Paper, Articles and Short Communications

ALBERS, WILLEM. Second order analysis of two-stage rank tests for the one-sample problem 1042–1052

ALVO, M. AND CABILIO, P. On the balanced incomplete block design for rankings 1597–1613

AMARI, SHUN-ICHI, TAKEUCHI, KEI AND OKAMOTO, ICHI. Asymptotic theory of sequential estimation: Differential geometrical approach 961–981

ARCONES, MIGUEL A. AND GINÉ, EVARIST. Some bootstrap tests of symmetry for univariate continuous distributions 1496–1511

BAI, Z. D. AND RAO, C. RADHAKRISHNA. Edgeworth expansion of a function of sample means 1295–1315

BAILEY, R. A. AND CHENG, C.-S. Optimality of some two-associate-class partially balanced incomplete-block designs 1667–1671

BARINGHAUS, LUDWIG. Testing for spherical symmetry of a multivariate distribution 899–917

BARRON, ANDREW R. AND SHEU, CHYONG-HWA. Approximation of density functions by sequences of exponential families 1347–1369

BARRON, ANDREW R. AND XIAO, XIANGYU. Discussion of "Multivariate adaptive regression splines" by J. H. Friedman 67–82

BASAWA, I. V., HUGGINS, R. M. AND SRIRAM, T. N. Sequential estimation for branching processes with immigration 2232–2243

BASAWA, I. V., MALLIK, A. K., MCCORMICK, W. P., REEVES, J. H. AND TAYLOR, R. L. Bootstrapping unstable first-order autoregressive processes 1098–1101

BASSIAKOS, YIANNIS, LO, SHAW-HWA AND MENG, XIAO-LI. Large-sample properties for a general estimator of the treatment effect in the two-sample problem with right censoring 1786–1812

BERTI, PATRIZIA, REGAZZINI, EUGENIO AND RIGO, PIETRO. Coherent statistical inference and Bayes theorem 366–381

BHANSALI, R. J. AND PAPANGELOU, F. Convergence of moments of least squares estimators for the coefficients of an autoregressive process of unknown order 1155–1162

BICKEL, PETER J. AND RITOV, J. Large sample theory of estimation in biased sampling regression models. I 797–816

BICKEL, PETER J., RITOV, YA'ACOV AND WELLNER, JON A. Efficient estimation of linear functionals of a probability measure P with known marginal distributions 1316–1346

BRANDWEIN, ANN COHEN AND STRAWDERMAN, WILLIAM E. Generalizations of James–Stein estimators under spherical symmetry 1639–1650

BREIMAN, LEO. Discussion of "Multivariate adaptive regression splines" by J. H. Friedman 82–91

BROWN, LAWRENCE D. AND HWANG, JIUNN T. Estimated confidence under the validity constraint 1964–1977
BROWN, LAWRENCE D. AND LOW, MARK G. Information inequality bounds on the minimax risk (with an application to nonparametric regression) 329–337
BRUNK, H. D. Fully coherent inference 830–849
BUCKLEW, J. A. AND NEY, P. E. Asymptotically optimal hypothesis testing with memory constraints 982–998
BUJA, ANDREAS, DUFFY, DIANE, HASTIE, TREVOR AND TIBSHIRANI, ROBERT. Discussion of "Multivariate adaptive regression splines" by J. H. Friedman 93–99
BURMAN, PRABIR. Rates of convergence for the estimates of the optimal transformations of variables 702–723
CABILIO, P. AND ALVO, M. On the balanced incomplete block design for rankings 1597–1613
CALVIN, JAMES A. AND DYKSTRA, RICHARD L. Maximum likelihood estimation of a set of covariance matrices under Löwner order restrictions with applications to balanced multivariate variance components models 850–869
CAO-ABAD, R. Rate of convergence for the wild bootstrap in nonparametric regression 2226–2231
CARROLL, RAYMOND J. AND STEFANSKI, LEONARD A. Deconvolution-based score tests in measurement error models 249–259
CASELLA, GEORGE AND GOUTIS, CONSTANTINOS. Improved invariant confidence intervals for a normal variance 2015–2031
CHANG, I.-SHOU AND HSIUNG, CHAO A. An E-ancillarity projection property of Cox's partial score function 1651–1660
CHAUDHURI, PROBAL. Nonparametric estimates of regression quantiles and their local Bahadur representation 760–777
CHEN, HUNG. Estimation of a projection-pursuit type regression model 142–157
CHEN, JIAHUA AND WU, C. F. J. Some results on s^{n-k} fractional factorial designs with minimum aberration or optimal moments 1028–1041
CHEN, ZEHUA. Interaction spline models and their convergence rates 1855–1868
CHENG, C.-S. AND BAILEY, R. A. Optimality of some two-associate-class partially balanced incomplete-block designs 1667–1671
CHIU, SHEAN-TSONG. Bandwidth selection for kernel density estimation 1883–1905
CHIU, SHEAN-TSONG. Some stabilized bandwidth selectors for nonparametric regression 1528–1546
CHOU, JINE-PHONE. Simultaneous estimation in discrete multivariate exponential families 314–328
CHOW, MO-SUK AND YU, QIQING. Minimaxity of the empirical distribution function in invariant estimation 935–951

CHU, C.-K. AND MARRON, J. S. Comparison of two bandwidth selectors with dependent errors 1906–1918
COMETS, FRANCIS AND GIDAS, BASILIS. Asymptotics of maximum likelihood estimators for the Curie–Weiss model 557–578
COX, DENNIS D. Gaussian likelihood estimation for nearly nonstationary AR(1) processes 1129–1142
COX, DENNIS D. AND LLATAS, ISABEL. Maximum likelihood type estimation for nearly nonstationary autoregressive time series 1109–1128
CSISZÁR, IMRE. Why least squares and maximum entropy? An axiomatic approach to inference for linear inverse problems . 2032–2066
CSÖRGŐ, MIKLÓS, GOMBAY, EDIT AND HORVÁTH, LAJOS. Central limit theorems for L_p distances of kernel estimators of densities under random censorship 1813–1831
DASGUPTA, ANIRBAN. Diameter and volume minimizing confidence sets in Bayes and classical problems 1225–1243
DASGUPTA, A. AND STUDDEN, W. J. Robust Bayesian experimental designs in normal linear models 1244–1256
DATTA, GAURI SANKAR AND GHOSH, MALAY. Bayesian prediction in linear models: Applications to small area estimation 1748–1770
DATTA, SOMNATH. Asymptotic optimality of Bayes compound estimators in compact exponential families 354–365
DATTA, SOMNATH. On the consistency of posterior mixtures and its applications 338–353
DE JONG, PIET. The diffuse Kalman filter 1073–1083
DEAN, A. M. AND LIN, MEILY. Trend-free block designs for varietal and factorial experiments 1582–1596
DHAR, SUNIL K. Minimum distance estimation in an additive effects outliers model 205–228
DICICCIO, THOMAS, HALL, PETER AND ROMANO, JOSEPH. Empirical likelihood is Bartlett-correctable 1053–1061
DONOHO, DAVID L. AND LIU, RICHARD C. Geometrizing rates of convergence, II 633–667
DONOHO, DAVID L. AND LIU, RICHARD C. Geometrizing rates of convergence, III 668–701
DUAN, NAIHUA AND LI, KER-CHAU. Slicing regression: A link-free regression method 505–530
DUFFY, DIANE, HASTIE, TREVOR, TIBSHIRANI, ROBERT AND BUJA, ANDREAS. Discussion of "Multivariate adaptive regression splines" by J. H. Friedman 93–99
DÜMBGEN, L. The asymptotic behavior of some nonparametric change-point estimators 1471–1495
DYKSTRA, RICHARD L. AND CALVIN, JAMES A. Maximum likelihood estimation of a set of covariance matrices under Löwner order restrictions with applications to balanced multivariate variance components models 850–869

DYKSTRA, RICHARD, KOCHAR, SUBHASH AND ROBERTSON, TIM. Statistical inference for uniform stochastic ordering in several populations 870–888
EATON, MORRIS L. AND TYLER, DAVID E. On Wielandt's inequality and its application to the asymptotic distribution of the eigenvalues of a random symmetric matrix 260–271
EL-KRUNZ, SADI M. AND STUDDEN, W. J. Bayesian optimal designs for linear regression models 2183–2208
ELLIS, STEVEN P. The singularities of fitting planes to data 1661–1666
EVANS, M. Chaining via annealing 382–393
FALK, MICHAEL AND KAUFMANN, EDGAR. Coverage probabilities of bootstrap-confidence intervals for quantiles 485–495
FAN, JIANQING. On the estimation of quadratic functionals 1273–1294
FAN, JIANQING. On the optimal rates of convergence for nonparametric deconvolution problems 1257–1272
FELDMAN, ISRAEL. Constrained minimax estimation of the mean of the normal distribution with known variance 2259–2265
FENECH, ALAN P. AND HARVILLE, DAVID A. Exact confidence sets for variance components in unbalanced mixed linear models . 1771–1785
FOSTER, DEAN P. Prediction in the worst case 1084–1090
FRANCISCO, CAROL A. AND FULLER, WAYNE A. Quantile estimation with a complex survey design 454–469
FRIEDMAN, JEROME H. Multivariate adaptive regression splines . 1–67
FRIEDMAN, JEROME H. Rejoinder 123–141
FULLER, WAYNE A. AND FRANCISCO, CAROL A. Quantile estimation with a complex survey design 454–469
FULLER, WAYNE A. AND NAGARAJ, NEERCHAL K. Estimation of the parameters of linear time series models subject to nonlinear restrictions 1143–1154
GEORGE, EDWARD I. Shrinkage domination in a multivariate common mean problem 952–960
GHOSH, B. K. AND HUANG, WEI-MIN. The power and optimal kernel of the Bickel–Rosenblatt test for goodness of fit 999–1009
GHOSH, MALAY AND DATTA, GAURI SANKAR. Bayesian prediction in linear models: Applications to small area estimation 1748–1770
GIDAS, BASILIS AND COMETS, FRANCIS. Asymptotics of maximum likelihood estimators for the Curie–Weiss model 557–578
GIJBELS, IRÈNE AND VERAVERBEKE, NOËL. Almost sure asymptotic representation for a class of functionals of the Kaplan–Meier estimator 1457–1470
GILULA, ZVI AND RITOV, YA'ACOV. The order-restricted RC model for ordered contingency tables: Estimation and testing for fit 2090–2101
GINÉ, EVARIST AND ARCONES, MIGUEL A. Some bootstrap tests of symmetry for univariate continuous distributions 1496–1511

GIRARD, DIDIER A. Asymptotic optimality of the fast randomized versions of GCV and C_L in ridge regression and regularization 1950–1963
GOLDSTEIN, MICHAEL. Belief transforms and the comparison of hypotheses 2067–2089
GOLUBEV, GEORGE K. AND HASMINSKII, RAFAEL Z. Discussion of "Multivariate adaptive regression splines" by J. H. Friedman 91–92
GOMBAY, EDIT, HORVÁTH, LAJOS AND CSÖRGŐ, MIKLÓS. Central limit theorems for L_p distances of kernel estimators of densities under random censorship 1813–1831
GOUTIS, CONSTANTINOS AND CASELLA, GEORGE. Improved invariant confidence intervals for a normal variance 2015–2031
GRAUBARD, BARRY I. AND KORN, EDWARD L. A note on the large sample properties of linearization, jackknife and balanced repeated replication methods for stratified samples 2275–2279
GU, CHONG AND WAHBA, GRACE. Discussion of "Multivariate adaptive regression splines" by J. H. Friedman 115–123
GU, MING GAO AND LAI, TZE LEUNG. Weak convergence of time-sequential censored rank statistics with applications to sequential testing in clinical trials 1403–1433
HAFF, L. R. The variational form of certain Bayes estimators .. 1163–1190
HALL, PETER. Bahadur representations for uniform resampling and importance resampling, with applications to asymptotic relative efficiency 1062–1072
HALL, PETER, ROMANO, JOSEPH AND DICICCIO, THOMAS. Empirical likelihood is Bartlett-correctable 1053–1061
HAMEDANI, G. G. AND WALTER, G. G. Bayes empirical Bayes estimation for natural exponential families with quadratic variance functions 1191–1224
HÄRDLE, W. AND MARRON, J. S. Bootstrap simultaneous error bars for nonparametric regression 778–796
HARVILLE, DAVID A. AND FENECH, ALAN P. Exact confidence sets for variance components in unbalanced mixed linear models . 1771–1785
HASMINSKII, RAFAEL Z. AND GOLUBEV, GEORGE K. Discussion of "Multivariate adaptive regression splines" by J. H. Friedman 91–92
HASTIE, TREVOR, TIBSHIRANI, ROBERT, BUJA, ANDREAS AND DUFFY, DIANE. Discussion of "Multivariate adaptive regression splines" by J. H. Friedman 93–99
HAWKINS, D. L. AND KOCHAR, SUBHASH C. Inference for the crossing point of two continuous cdf's 1626–1638
HECKMAN, NANCY E. AND WOODROOFE, MICHAEL. Minimax Bayes estimation in nonparametric regression 2003–2014
HEITJAN, DANIEL F. AND RUBIN, DONALD B. Ignorability and coarse data 2244–2253

HELMERS, R. On the Edgeworth expansion and the bootstrap approximation for a Studentized U-statistic 470–484
HORVÁTH, LAJOS. On L_p-norms of multivariate density estimators 1933–1949
HORVÁTH, LAJOS, CSÖRGŐ, MIKLÓS AND GOMBAY, EDIT. Central limit theorems for L_p distances of kernel estimators of densities under random censorship 1813–1831
HSING, TAILEN. On tail index estimation using dependent data . 1547–1569
HSIUNG, CHAO A. AND CHANG, I.-SHOU. An E-ancillarity projection property of Cox's partial score function 1651–1660
HUANG, WEI-MIN AND GHOSH, B. K. The power and optimal kernel of the Bickel–Rosenblatt test for goodness of fit 999–1009
HUGGINS, R. M., SRIRAM, T. N. AND BASAWA, I. V. Sequential estimation for branching processes with immigration 2232–2243
HWANG, JIUNN T. AND BROWN, LAWRENCE D. Estimated confidence under the validity constraint 1964–1977
